

# DRIVER TRAINING COURSE

## MAP-21 Compliance Program

**School Bus Safety Company** is pleased to announce that our Driver Training Course MAP-21 Compliance Program is now available online, on portable USB drives, or traditional DVD sets.

The supplemental program addresses the two major areas of MAP-21 regulations: **Entry Level Driver Training (ELDT)** and the **Training Provider Registry (TPR)**. A **Safety Management System (SMS)** while not required, is recommended. Using this course along with the 25 subject Driver Training Course will ensure that you are able to achieve 100% compliance with the upcoming MAP-21 regulations. Additional program materials include:

**ELDT Trainer's Guide** | **Driver's Job Aide**  
**TPR Booklet** | **SMS Booklet**

All requirements for the ELDT and TPR must be complied with by February 7, 2022 per the Final Rule from the FMCSA on January 29, 2020. The delay will give the State Driver Licensing Agencies and the FMCSA adequate time to integrate the electronic transfer of information. We believe the requirements for the ELDT will not change as to what has previously been published.

- The date for training providers to upload ELDT training certification information into the registry is postponed until 2022
- The date for State Driver Licensing Agencies to receive driver-specific ELDT data is postponed until 2022
